

QUALITY POLICY

Quality of products and services provided by LUKOV Plast spol. s.r.o. is crucial for winning a recognition in the field of development and production of plastic injection moulded parts and electrical components for the automobile industry including their installation.

On the basis of our company tradition and high quality requirements imposed by our customers, we know that the quality of our products is a prerequisite for competitiveness and success of our company. We also place a great emphasis on environmental protection and compliance with all legal requirements within the sphere of our activity.

THEREFORE WE STRIVE FOR THE FOLLOWING:

Meeting quality requirements, demands and expectations of our customers and other interested parties.

Annually define and review the quality objectives and evaluate their accomplishment.

Prevention of defects in all activities and timely detection of possible causes of defects in all phases of preparation and implementation of products.

The analysis of quantities, types, causes and defects is a framework for the annual review, determination and evaluation of the achievement of quality objectives.

Through continuous improvement and development of processes, training and qualification of staff, improvement of used processes and techniques, as well as regular inspections and analysis of results, we are working on further development of our quality management system. At the same time, we are looking for solutions that are more environmentally friendly.

Our goal is a high level of quality that can be acquired when each employee strives to achieve zero defects through continual improvement of processes and products. Innovation and continuous improvement is our everyday task.

We strive for the work of all employees of LUKOV Plast spol. s r.o. to realize this market and customer-oriented quality policy.

We do not say "no" before we ascertain. We always find an alternative.

Do you need? We know-how.
